

GB8LEDB

800W 3-Stage LED Lamp only, Diffused Lighting System

Multiquip introduces LED technology to our line of GloBugs. LED bulbs are safer, producing significantly less heat than Metal Halide bulbs while offering better color consistency, immediate strike/re-strike operations, and a long operating life.

This model is the "balloon light only" and does not include a stand.

- Superior Lighting Properties - Color consistency is near perfect, with better color rendering and overall quality
- Shock resistant LED assembly - Protects the lamps and water resistant
- Long life hours, low maintenance - Up to 40,000 hours of operating life per bulb
- Safer; LED holds less heat - LED Lamps (158°) vs. Metal Halide (422°)
- Optional illuminance settings - 8-stage dimming controls (400W, 600W, 800W)
- 110,000 lumens (800W), 68,000 lumens (600W), 53,000 lumens (400W)
- Safe, convenient operating process - Instant start and restarting
- Environmentally, economically smart - LED reduces operating costs and CO2 emissions up to 85%
- Flexible set-up options - Three position Pentapod stand, 3 Stage (gas assist) vertical mast assembly

Unit Specifications

Deployment Style	Kit
Voltage	115 V
Hertz	50/60Hz
Amperage	6.9A @ 800W 115V A
Dimming Control	400W / 600W / 800W
Total Lux	53,000 (400W) / 68,000 (600W), 110,000 (800W)
Operating Temps	-23 - 104° FF
Mast Design	Manual w/ 3 stages (gas assist)
Max Height	13.2 ft.
Weight	48 lb.
Appropriate Generator	850W and above
Max Wind Loading	25 - 30MPH
