

# GB2000

Light Tower Conversion Kit; 2x1000W Metal Halide Lamp

The GB2000 diffuser enables Multiquip light tower users to meet requirements for glare-free lighting. Easily attaching to the mast T-bar in place of two conventional lamps, it will dramatically reduce glare in the work area, eliminate shadows and improve safety. Two 1,000 watt metal-halide lamps are enclosed by a durable polyester balloon inflated by a quiet industrial fan. The GB2000 is deal for highway work, job sites and special events.

- 360° glare-free illumination featuring two 1,000 watt metal halide lamps
- Rapid bulb restrike time of only 6 to 10 minutes
- Balloon inflates automatically and quickly – less than thirty seconds – after activating light
- Ties directly into the light tower electrical system
- Excellent visibility with coverage of up to 300 fee
- Transport and storage is facilitated by its self-contained design
- Limitless applications including industrial, mining, traffic control and special events
- Operator has option of leaving two of the original lights in place for spot lighting
- Adaptable to the MLT-series or the LT-12D series Multiquip light tower

## Unit Specifications

Required Generator Sizing	3.2KW and Above
Fan Current	0.87 A
Fan Voltage	115 V

## Lamp Specifications

Type	1000W Metal halide (x2)
Number of Bulbs	2
Current	8.2 A
Voltage	115 V
Lumens	220,000 Lm
