

GB4000

Light Tower Conversion Kit; 4x1000W Metal Halide Lamp

Multiquip’s GB4000 lighting solution enables light tower users to not only meet regulatory requirements for diffused lighting, but permit greater soft, shadowless illumination coverage for operator comfort and safety.

- Limitless operating applications including industrial challenges, mining, traffic control, security, and special events.
- 360° glare-free illumination featuring four 1,000W metal halide lamps.
- Meets DOT diffused lighting specifications.
- Ties directly into Light Tower electrical system.
- Flexible connection bracket enables simple balloon-to-mast assembly.
- Simple Electrical set-up with quick disconnect 3-pin connections.
- Off-set four metal halide bulbs within the protective lamp cage ensure optimum candela projection.
- Balloon inflates automatically and quickly (less than 30 seconds).
- Rugged balloon bag material is washable.
- Excellent Light coverage 360° and up to 300’.

Ballon lamp assembly folds into a convenient carrying case

The GB4000 easily connects to the electrical and ballast systems of the light tower for seamless operation.

Unit Specifications

Required Generator Sizing	4.2Kw and above
Fan Current	1.2 A
Fan Voltage	24 V

Lamp Specifications

Type	1000W Metal Halide
Number of Bulbs	4
Current	37.2 A
Voltage	120 V
Lumens	428,000 Lm
